

CSEE 4119: Computer Networks

Due on Thursday, February 6th, 2014

Assignment 1 – Cover sheet

P. Prakash, W. An, P. Nirantar, R. Yu, X. Zhu (TAs) A. Chaintreau (instructor)

Fill in and include this cover sheet with your first assignment. Assignments are due at 1:15 pm, handed in at the beginning of class or during office hours. Starting from 1:15pm you will be counted a late day (Yes, it means that giving your homework at the end of the class will be a day late, so you'd better take some extra time after the class anyway!).

- Each late day (starting from 1:15pm on the day of the class, one by 24h period) penalizes your grade for this assignment by 5%.
- Each student will have a total of three free late days *no questions asked* during the semester.
- No assignment will be accepted after solutions are given. Solutions are generally given one lecture after the assignment is due (which means you have roughly a maximum of 3-4 late days to handle your assignment, from Tuesday to Friday).
- Solutions may sometimes be given exactly at the due date (especially before a midterm or final). In that case, no late days are possible.

I have read and understand the rules for the class, that I can find at the following URL:
<http://compnet-spring2014.wikischolars.columbia.edu/Rules>

I acknowledge and accept the Honor Code.
